

Building a Global Uranium Company

Strongly Placed and Perfectly Timed

Corporate Update

John Borshoff – Managing Director/CEO

18 March 2024

DYL: ASX / NSX (Namibia)
DYLLF: OCTQX

Disclaimer

This presentation has been prepared by Deep Yellow Limited ABN 97 006 391 948 (Company or Deep Yellow) for general information purposes only. The presentation does not constitute a prospectus or equivalent document nor does it constitute financial product or investment advice. It does not take into account the investment objectives, financial situation or particular needs of any investor.

The presentation is not and should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company, or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation.

The presentation has been prepared by the Company based on information available to it. Due care and attention has been taken in the preparation of this presentation, however the information contained in this presentation (other than as specifically stated) has not been independently verified for the Company or their respective directors and officers, nor has it been audited. Accordingly, the Company does not warrant or represent that the information contained in this presentation is accurate or complete. To the fullest extent permitted by law, no liability, however arising, will be accepted by the Company, or their respective subsidiaries, directors, officers or advisers, for the fairness, accuracy or completeness of the information contained in the presentation. No responsibility or liability is assumed by the Company or their respective subsidiaries, directors, officers or advisers for updating any information in this document or to inform any recipient of any new or more accurate information or any errors of mis-descriptions of which the Company or any of its respective directors, officers or advisers may become aware.

Financial Information

All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. Amounts, totals and change

percentages are calculated on whole numbers and not the rounded amounts presented. This presentation includes certain historical financial information extracted from audited consolidated financial statements and information released to ASX (collectively, the Historical Financial Information). The Historical Financial Information is presented in an abbreviated form insofar as it does not include all the presentation and disclosures, statements or comparative information as required by the Australian Accounting Standards (AAS) and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations Act.

Past Performance

Past performance metrics and figures (including past share price performance of the Company), as well as pro forma financial information, included in this Presentation are given for illustrative purposes only and should not be relied upon as (and is not) an indication of the Company or any other party's views on the Company's future financial performance or condition or prospects. Investors should note that past performance of the Company, including in relation to the historical trading price of the Company's shares, mineral resources, costs and other historical financial information cannot be relied upon as an indicator of (and provides no guidance, assurance or guarantee as to) future performance, including the future trading price of shares in the Company. The historical information included in this Presentation is, or is based on, information that has previously been released to the market.

Forward Looking Statements

This presentation contains "forward-looking information" that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes,

among other things, statements with respect to the pre-feasibility and any feasibility studies, the Company's business strategy, plan, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this presentation are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. There can be no assurance that actual outcomes will not differ materially from forward-looking statements. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors which are subject to change, including but not limited to general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of uranium; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accident, labour disputes and other risks of the mining industry; and delays in obtaining governmental approvals or financing or in the completion of development or construction activities.

Disclaimer *(continued)*

This list is not exhaustive of the factors that may affect the Company's forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. The Company disclaims any intent or obligations to finalise, check, update or revise any forward-looking statements, whether as a result of new information, estimates, options, future events or results or otherwise, unless required to do so by law. Statements regarding production targets and plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

Competent Person Statements – Previously reported information

This Presentation contains estimates of Mineral Resources, Ore Reserves, Production Targets and Exploration Results of the Company.

The information as it relates to Mineral Resource estimates of the Namibian projects was compiled by Martin Hirsch, a Competent Person who is a Professional Member of the Institute of Materials, Minerals and Mining (UK) and the South African Council for Natural Science Professionals. Mr Hirsch, who is currently the Manager, Resources & Pre-Development for RMR, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. Mr Hirsch consents to the inclusion in this presentation of the matters based

on the information in the form and context in which it appears. Mr Hirsch holds shares in the Company.

The information in this presentation relating to: (1) the Mineral Resource and Ore Reserve estimates for the Tumas Project in Namibia are extracted from the Company's announcements to ASX dated 29 July 2021 'Drilling at Tumas 3 Delivers Significant Resource Upgrade', 2 September 2021 'Tumas Delivers Impressive Indicated Mineral Resource', 2 February 2023 'Strong Results From Tumas Definitive Feasibility Study', 29 November 2023 'Resource Drilling grows Tumas Towards Plus 30 Year LOM' and 12 December 2023 'DFS Review Strengthens Tumas Project's Flagship Status as a Long-Life, World-Class Uranium Operation'; (2) the production targets for the Tumas Project are extracted from the Company's announcement to ASX dated 2 February 2023 'Strong Results From Tumas Definitive Feasibility Study'; (3) the exploration results and mineral resource estimates for the Omahola Project, the Tubas Red Sand Project, the Tubas Calcrete Deposit and the Aussinanis Project in Namibia, are extracted from the Company's announcements to ASX dated 4 November 2021 'Omahola Basement Project Resource Upgrade to JORC 2012', 24 March 2014 'Tubas Sands Project – Resource Update', 28 February 2012 'TRS Project Resources Increased' and 31 March 2023 'Aussinanis Project Resource Upgrade To JORC (2012)'; (4) the Mineral Resource and Ore Reserve estimates for the Mulga Rock Project in Australia are extracted from the Company's announcements to ASX dated 20 January 2023 'Critical Minerals Assessment of Mulga Rock Project' and 26 February 2024 'Strong Resource Upgrade Drives Mulga Rock Value'; (5) the production targets for the Mulga Rock Project are extracted from the Company's release to ASX dated 16 June 2022 'VMY: Scheme Booklet registered with ASIC'; and (6) the Mineral Resource estimates for the Angularli Deposit/Alligator River Project in Australia are extracted from the Company's announcement to ASX dated 3 July 2023 'Robust Resource Upgrade Delivered At Angularli'.

These announcements are available on the Company's website at www.deeppyellow.com.au/investor-centre/asx-announcements/.

In relation to Exploration results, Mineral Resource estimates and Ore Reserve estimates referred to in these announcements, the Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. In relation to production targets referred to in these announcements, the Company confirms that all material assumptions underpinning the production target, and the forecast financial information derived from the production target, in the initial announcement continue to apply and have not materially changed.

Rounding

A number of figures, amounts, percentages, estimates, calculations of value and fractions in this Presentation are subject to the effects of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this Presentation.

01

Equity Raising Overview

Equity Raising Overview

Structure and Size

- A\$220M placement at \$1.225 (3.9% discount to last closing)
 - Tranche 1: \$140.5M (completed 15 March 2024)
 - Tranche 2: \$79.5M (to be settled early May 2024)
- \$30 million Share Purchase Plan (**SPP**) at the same price as the Placement (closes 8 April 2024)
- Issue of approximately 204M fully paid shares

Indicative Timetable

Key Event	Indicative Date
Completion of SPP	Monday, 15 April 2024
General Meeting to approve Tranche 2, SPP shortfall offer (if any) and Director participation in Tranche 2	On or about, Tuesday, 30 April 2024
Settlement of Tranche 2	On or about, Wednesday, 1 May 2024
Allotment of Tranche 2	On or about, Thursday, 2 May 2024

Use of Funds ¹	A\$M
Tumas Development Capital	220
Mulga Rock Project	5
Exploration	5
Working Capital and Fees	20
Total	250

Pro-forma Capitalisation ¹	
Shares on Issue	765M
Placement Shares	180M
SPP Shares	24M
Total Shares on Issue	969M
Cash Balance ² (31 December 2023) A\$	279M
Total Debt	Nil

Note:

(1) Assumes completion of the A\$220M Placement and A\$30m raised via the SPP

(2) Assumes that the all funds raised occurred on 31 December 2023.

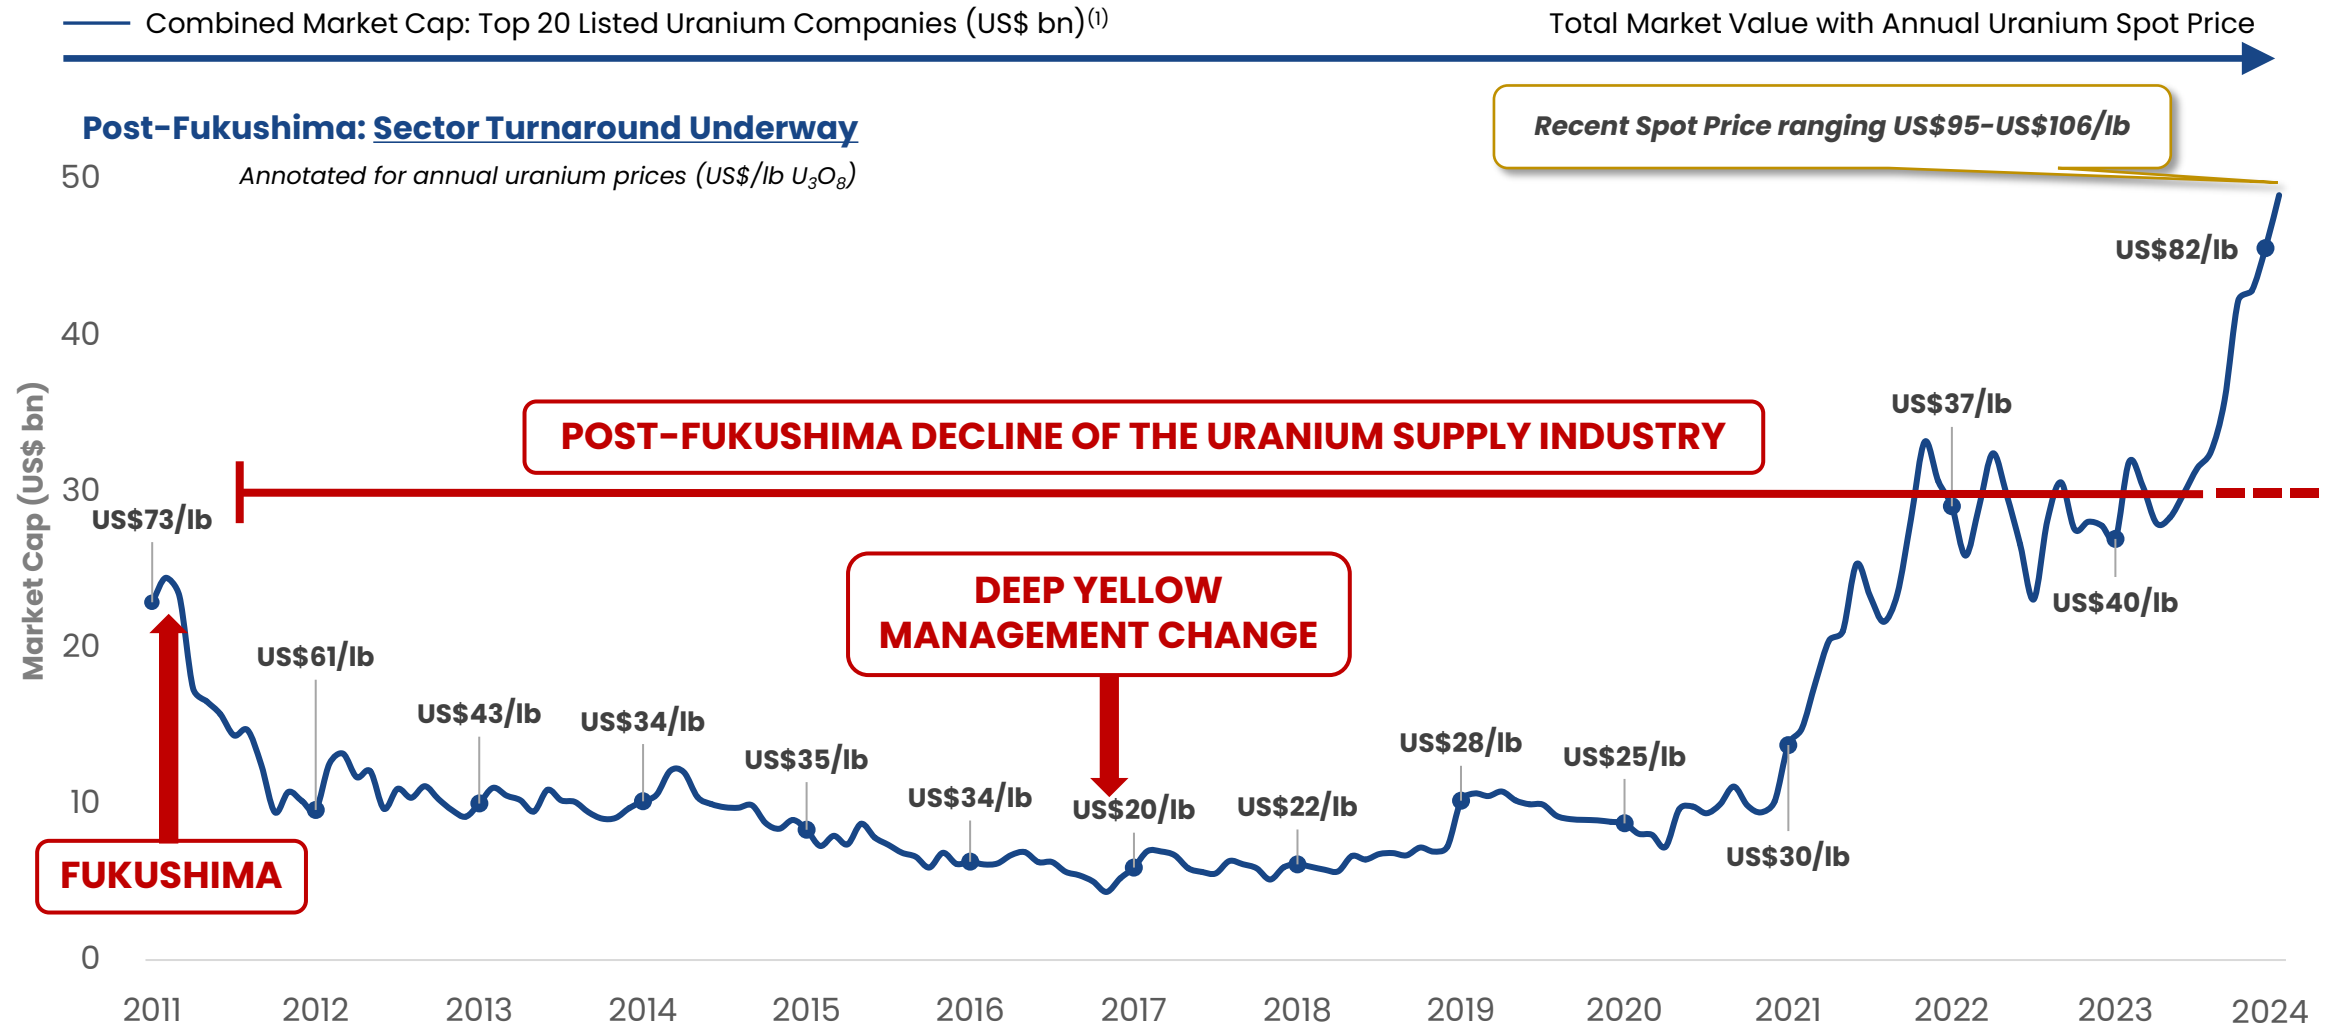

02

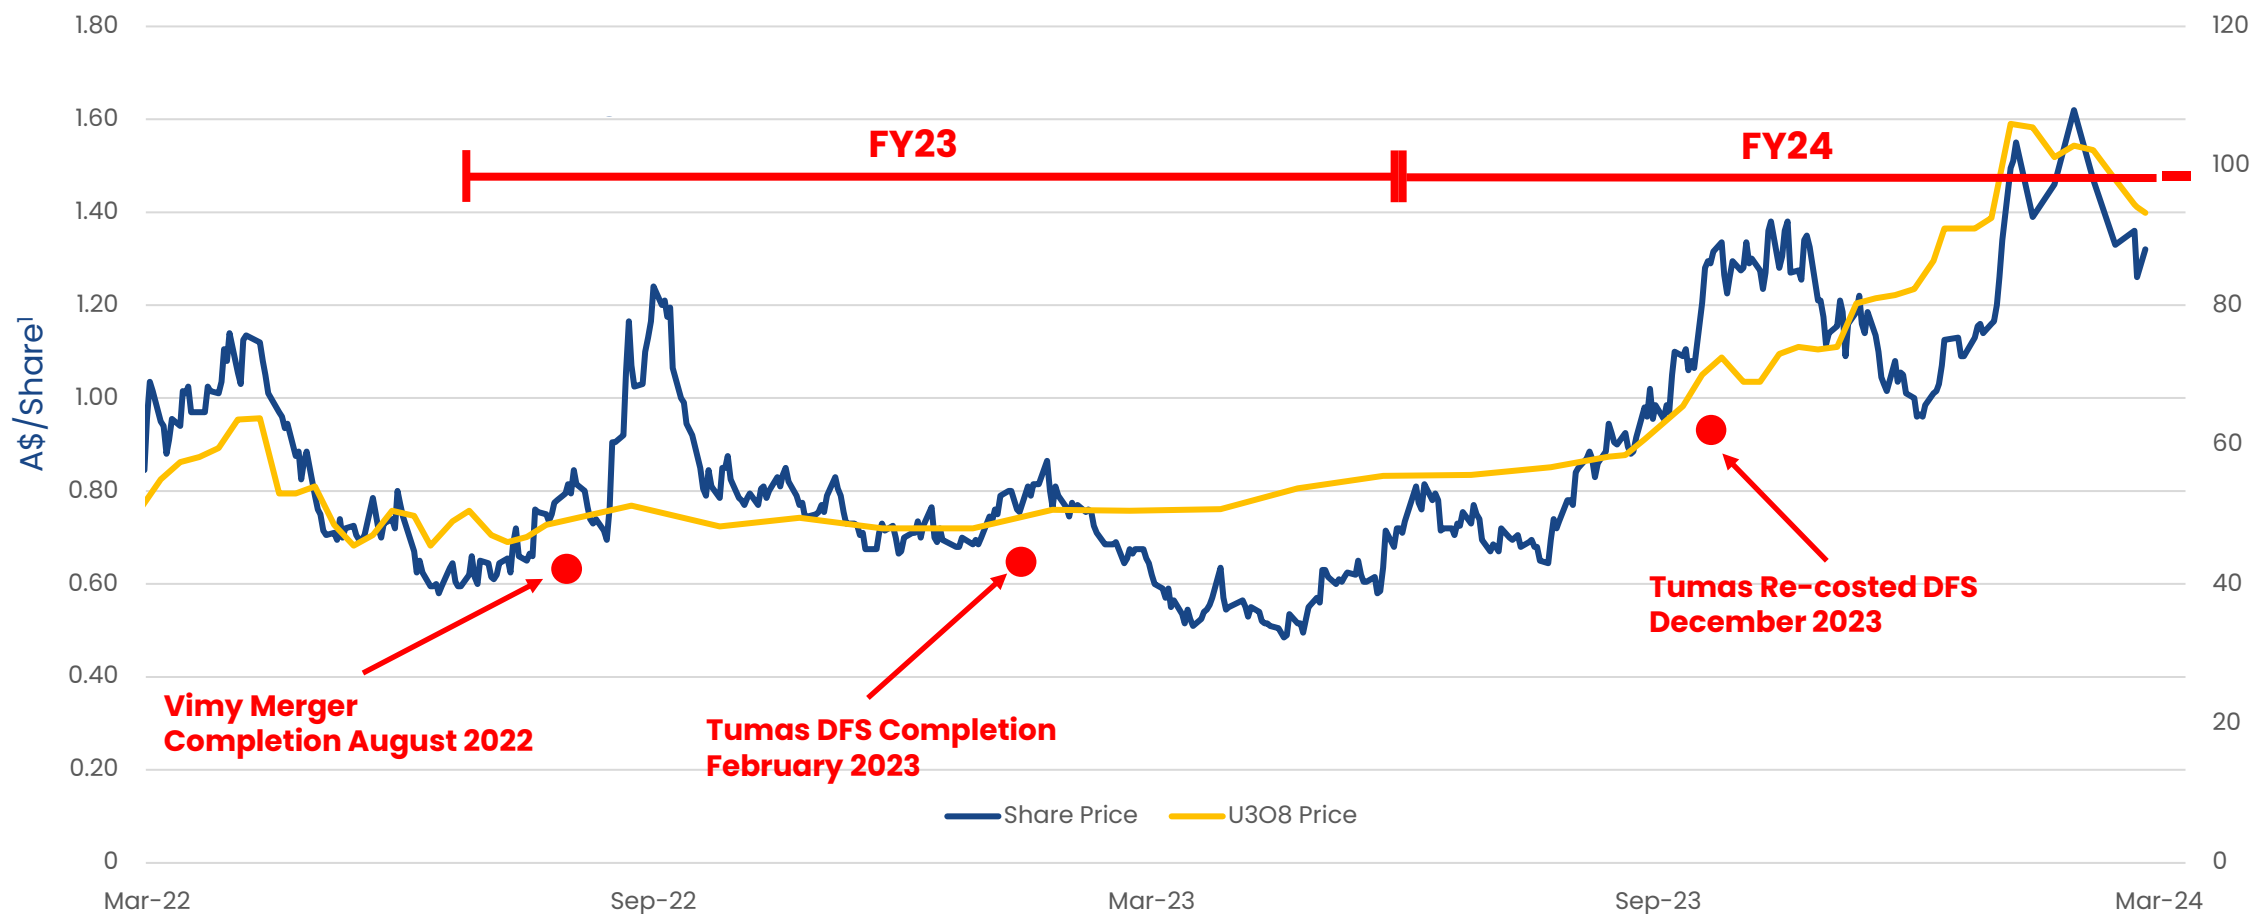

Deep Yellow – Well Positioned

Global Uranium Sector Market Cap Recovery (2011-2024)

- Fukushima: Heavy Impact on Supply Sector

Capital Structure – ASX300 Company – Performance FY23/Early FY24

≈A\$1Bn Market Cap	Nil Debt	A\$170M Cash ¹	879M Shares on Issue
-----------------------	-------------	------------------------------	-------------------------

(1) Cash and equivalents as at 31 December 2023 plus Tranche 1 settlement

MAJOR SHAREHOLDERS		
5% Board and Management	9.8% Paradise Investments	4% Collines Investments

Best Positioned Uranium Mid-Cap Company Globally

Deep Yellow has **global diversity**, which is seen as a necessity by off-takers, with long-life projects **located in two Tier-1 mining jurisdictions**

Significant production capability – once in production, Deep Yellow will be the largest pure-play uranium producer on the ASX – **production capacity +7Mlb p.a.¹**

Led by a **highly experienced uranium team** with extensive knowledge across the operational lifecycle, offtake contracting and project finance complexities – **proven mine builders**

Significant exploration upside with potential to develop large scale, long-life projects within the Deep Yellow portfolio

Delivering on vision – 7 years successfully establishing a Tier-1 uranium platform and next 5 years focussing on execution to production while further growing the global resource base

Financially disciplined with strong governance – \$A250m equity raise provides a strong platform to work towards production commencement at Tumas and maintain growth strategy

03

Uranium is Critical for a Clean Energy Future

Demand – Governments Pivoting Increasingly Towards Nuclear

Increasing global concern for energy security

- **Eastern European countries** embracing nuclear as “no other option”
- **Orano** – leaving Niger post-coup
- **Russia/China** – bidding war for Kazatamprom product

Inability for renewables to deliver

- **Sweden changes policy** from “100% renewable electricity production” to “100% Fossil Free” – announces new reactor build programs
- **Europe’s largest onshore wind farm Markbygden ETT** facing bankruptcy
- **IEA (14 February 2024)** recognition of nuclear essential for achieving energy security and decarbonisation

Global footprint expanding with ever-increasing number of governments turning to nuclear power

- **Belgium** reverses decision to shut down reactors in 2025 – extended to 2036 + **building 2 more**
- **Italy** planning to introduce nuclear as early as 2032
- **Bulgaria** plans to build 4 new reactors
- **France** accelerating construction of 14 new generation reactors
- **UK** accelerating nuclear commitment – 25% nuclear by 2050 – currently 15%

Never such a top-down resurgence since the 1970s oil shock

At the UN's COP28 climate change conference, 22 countries signed up to the goal of tripling global nuclear energy capacity by 2050, as the only means of achieving stated emission targets

Supply Under Major Pressure – Uranium Price Primed for Recovery

Degradation of uranium supply industry over last decade

Limited greenfield developments opportunities

Long period of stagnation creating concerns industry unable to respond to future requirements

Exposes huge challenges to meet new demand even with a major uranium price increase

- **Major uranium producers reporting serious underperformance** – (Kazatomprom, Cameco) **exacerbating existing shortfalls**
- **No new production** – recent Spot Price ranging US\$95–US\$106/lb and still no greenfield start-ups announced
- **Global mining houses (Rio Tinto) have exited** the industry, leaving a huge vacuum with inexperienced juniors to fill the gap
- **Uranium inventory rundown accelerating**
- **Russia/Kazakhstan/Niger present supply growth uncertainty**
- **Diversity, security, longevity of supply and achieving increased production to meet new demand are key issues to resolve**

Nuclear Fuel Cycle Under Severe Pressure – **Greenfield projects needed!**

04

Strong Team and Well-Positioned for Further Growth

Best-in-Class Board and Team

A HIGHLY EXPERIENCED TEAM WITH A PROVEN TRACK RECORD

- Proven and successful track record of exploring, developing, financing and operating uranium projects
- Experienced team is led by **John Borshoff** (48 years' uranium experience), with the Board chaired by **Chris Salisbury** (30 years' Rio – 12 years' uranium experience)
- Technical team led by **Darryl Butcher** (26 years' uranium experience), who brings significant uranium development experience from Kayelekera Uranium Mine (Malawi) and Langer Heinrich Uranium Mine (Namibia)
- **Dustin Garrow** brings more than 40 years' professional experience in global commercial nuclear fuel markets
- Senior team has over 500 years of combined uranium

Executive Leadership Team

Chris Salisbury**	Non-Executive Chairman
John Borshoff*	CEO / MD
Gillian Swaby *	Executive Director
Victoria Jackson	Non-Executive Director
Greg Meyerowitz	Non-Executive Director
Tim Lindley	Non-Executive Director
Mark Pitts	CFO/Company Secretary

Senior Technical Team

Perth

Ed Becker*	Head of Exploration
Darryl Butcher*	Head of Project Development
Andrew Mirco*	Head of Business Development
Dr Alex Otto*	Group Chief Geologist
Cathy Paxton	Head of Sustainability
Xavier Moreau***	Australian Exploration Manager

Namibia

Dr Katrin Kärner*	Exploration Manager
Martin Hirsch	Manager Resources/Pre-development
Dr JC Corbin*	Senior Geologist-Specialist

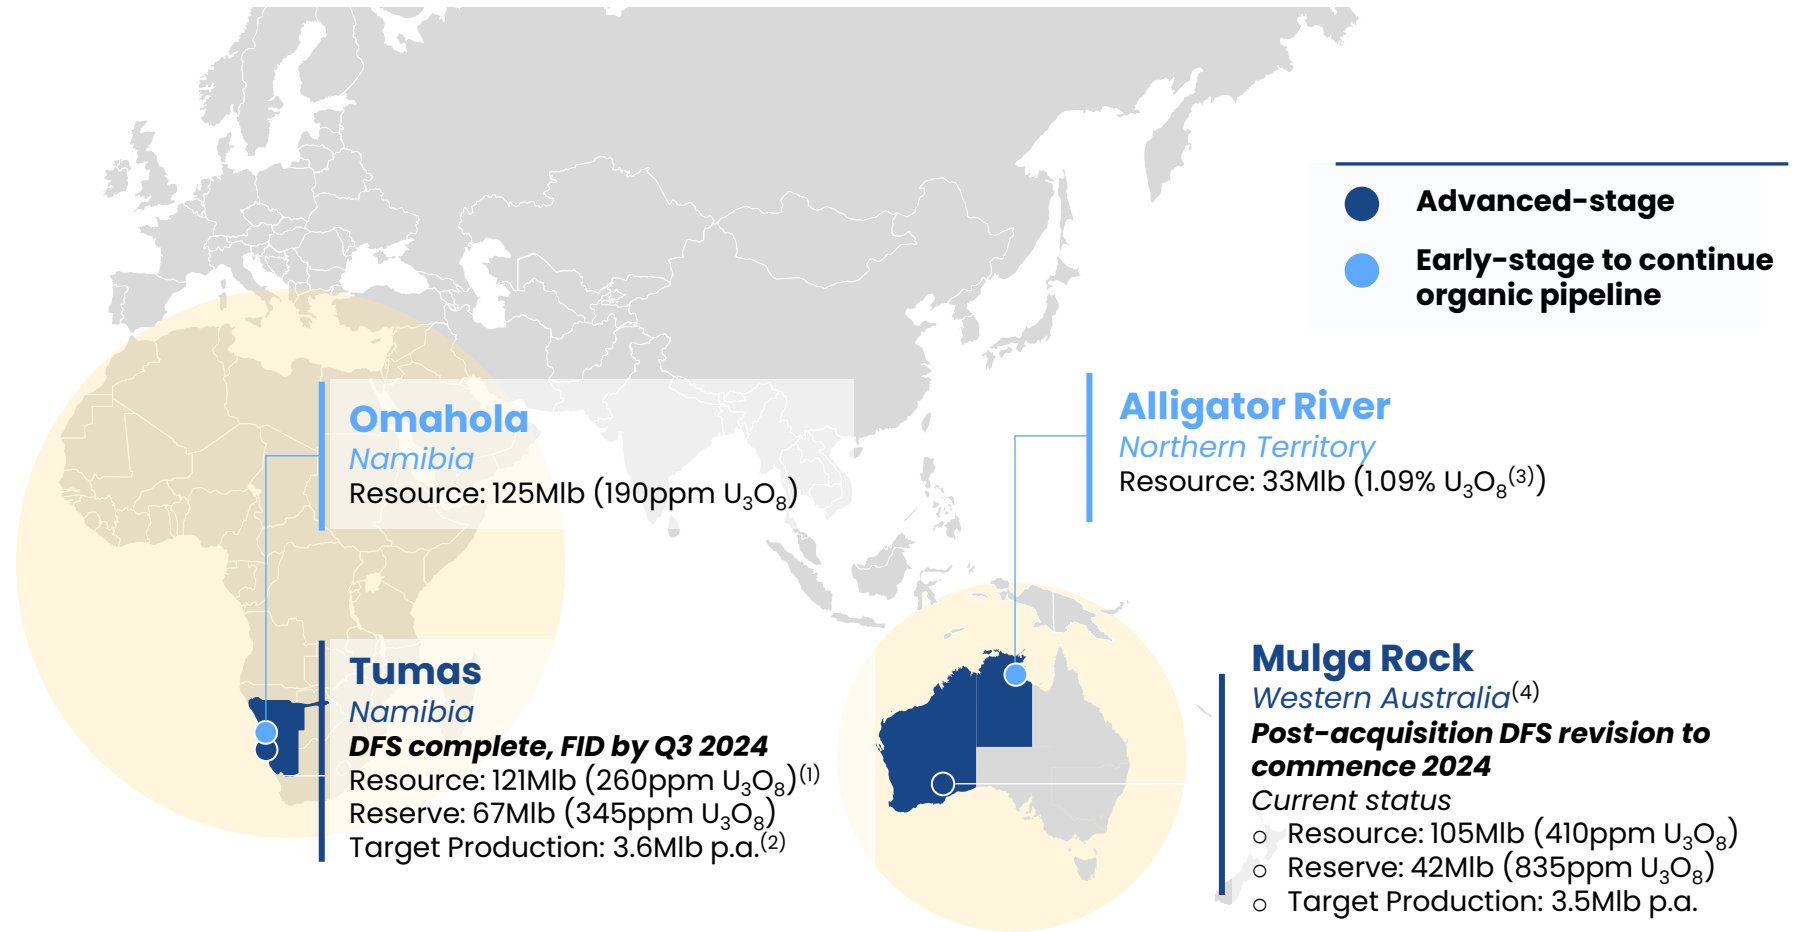

United States

Dustin Garrow*	Head of Marketing
----------------	-------------------

* Ex-Paladin **Ex-Rio Tinto – ERA and Rössing ***Ex-Orano

Globally Diversified with Two Advanced, Long-Life Projects

- Project portfolio provides diversity by asset, stage of development and geographic location
- Largest uranium resource base of any ASX-listed company **(431 Mlb)**
- Uniquely positioned as one of the few uranium companies globally able to execute to development and production, with credible multi-mine asset exposure

Note: Resource & Reserve metrics reported on a 100% basis; (1) Deep Yellow currently owns 100% of Tumas. Oponona (local Namibian partner) has a right to acquire 5% of the project; (2) DFS forecast production capacity (3) 1.09% is equivalent to 10,900ppm U₃O₈ (4) Refer ASX releases 16 June 2022, 9 August 2022, 20 January 2023 and 26 February 2024

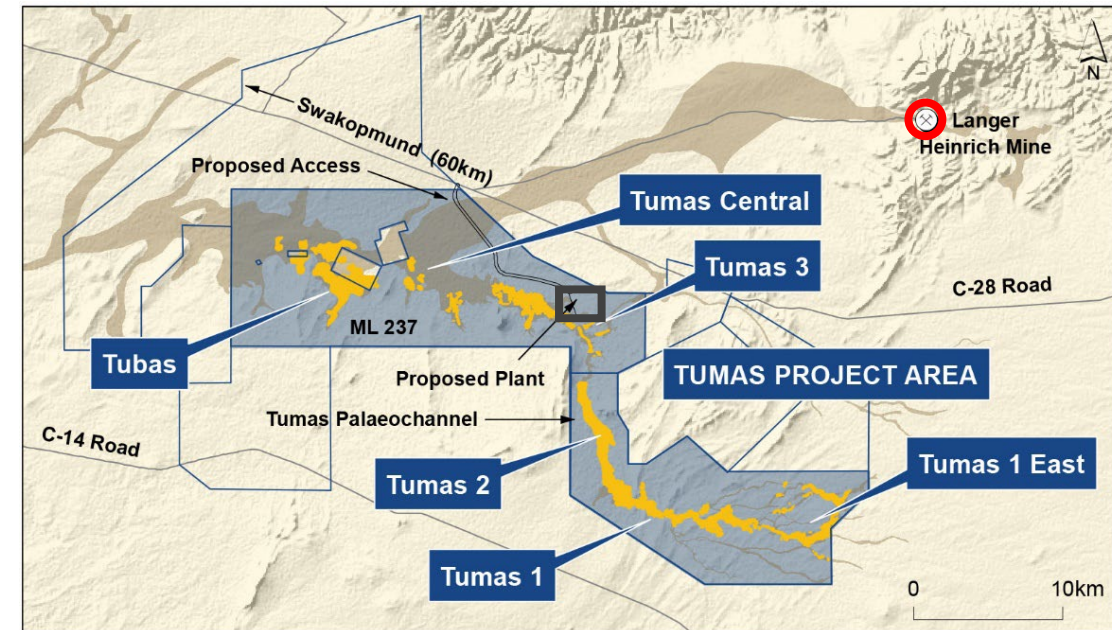

05

Diversified and Advanced Project Pipeline

Flagship Tumas Project, Namibia – Overview

- Uranium and mining friendly jurisdiction. **20-year Mining Licence granted, effective September 2023**
 - Allows the Project to progress towards production, establishing Tumas as the 4th uranium mine in Namibia
- Ore Reserves of 67.3Mlb increased by 120% in CY2021
 - **22.5-year LOM achieved**
- DFS completed January 2023. **Re-Costing Study completed in December 2023⁽¹⁾**
 - Results strengthen Project as a a long-life, world-class uranium operation
- **Potential to extend LoM by a further 10+ years**
 - Inferred Resources of 30Mlb available to further expand Ore Reserve base
 - 25% of prospective channel remains to be tested
- Project supported by:
 - grid power
 - existing water supply
 - land (sealed road access), sea (Class 7 port) and air (international) transport infrastructure

- Ex-Paladin Core Team now with Deep Yellow – established and operated Langer Heinrich
- ▭ Tumas processing plant location

*Note: Deep Yellow currently owns 100% of Tumas. Oponona (local Namibian partner) has a right to acquire 5% of the project.
(1) Refer ASX announcement 12 December 2023*

Tumas Project Analysis (US\$), Re-Costed December '23

Key Commentary²

- Head grade of 340ppm U₃O₈ (av)
- Annual production (max) of 3.6Mlbpa
- Using vanadium price of US\$8.90/lb
- Latest, most up-to-date uranium project, with December '23 re-costed DFS

Project Financials (Ungeared): Real ³	Unit	75/lb	81/lb ¹	90/lb
Project operating life	Years	22	22	22
U ₃ O ₈ Produced	Mlb	64	64	64
Gross revenue: total	\$M	4,950	5,314	5,908
Operating margin (EBITDA) LOM	\$M	2,463	2,815	3,389
Operating margin (EBITDA) annual average	\$M	111	127	152
Initial capital (excl. \$51M pre-prod operating costs)	\$M	(360)	(360)	(360)
C1 cost (U ₃ O ₈ basis with V ₂ O ₅ by-product)	\$/lb	34	34	34
All-in Sustaining Cost (U ₃ O ₈ basis with V ₂ O ₅ by-product)	\$/lb	38.6	38.8	39.1
Project NPV (post tax)	\$M	570	663	878
Project IRR (post tax)	%	27.0	27.8	36.1

**Recent Spot Price
ranging US\$95-
US\$106/lb**

Tumas Project Timeline

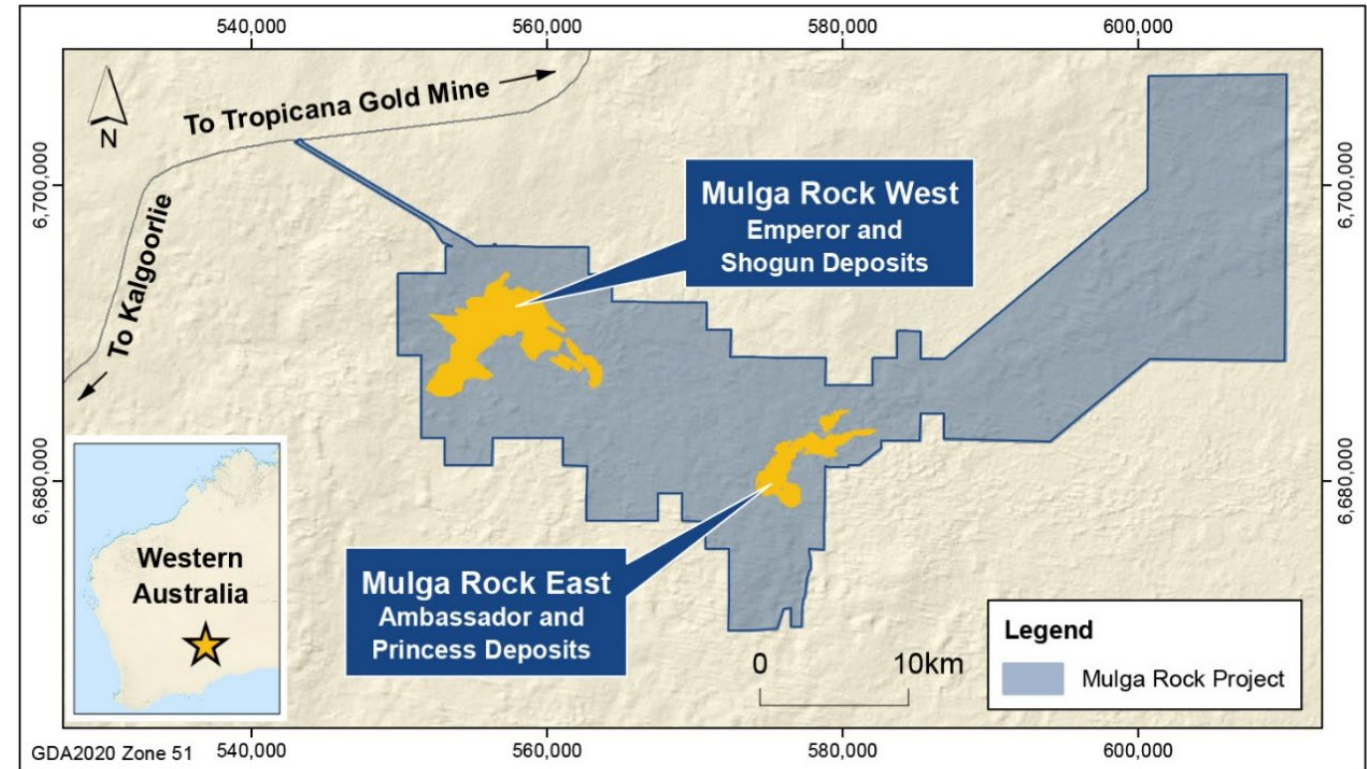

¹ This is a uranium price forecast produced dated Q3 2023 by TradeTech which refers to the Forward Availability Model (FAM) 2 scenario reflecting a restricted supply profile impacted by a greater probability of risks affecting production plans and economics.

² Refer ASX releases 2 February and 12 December 2023. ³ Financials based on 100% ownership. Oponona (Namibian partner) will own 5% interest of Project. % of recoverable costs will be deducted (interest free) from distribution of profits to Oponona (limited recourse).

Mulga Rock Project, Western Australia – 100% DYL

- Project acquired through Vimy Resources merger in August 2022
- Located in the Tier-1 mining jurisdiction of Western Australia, **with granted Mining Leases**
- Globally significant **Mineral Resource of 115.1Mt @ 410ppm for 104.8Mlb U_3O_8** , positioning Mulga Rock as one of the largest, undeveloped uranium projects in Australia¹
- **Only uranium project in WA to reach “Substantial Commencement”**, opening pathway to development
- Significant project value upside identified additional to uranium **with critical minerals including Rare Earth Oxides**¹
- Ideal development timeline to capture upside in multiple commodities
- **Only WA project positioned to capture the coming upside in the U market**

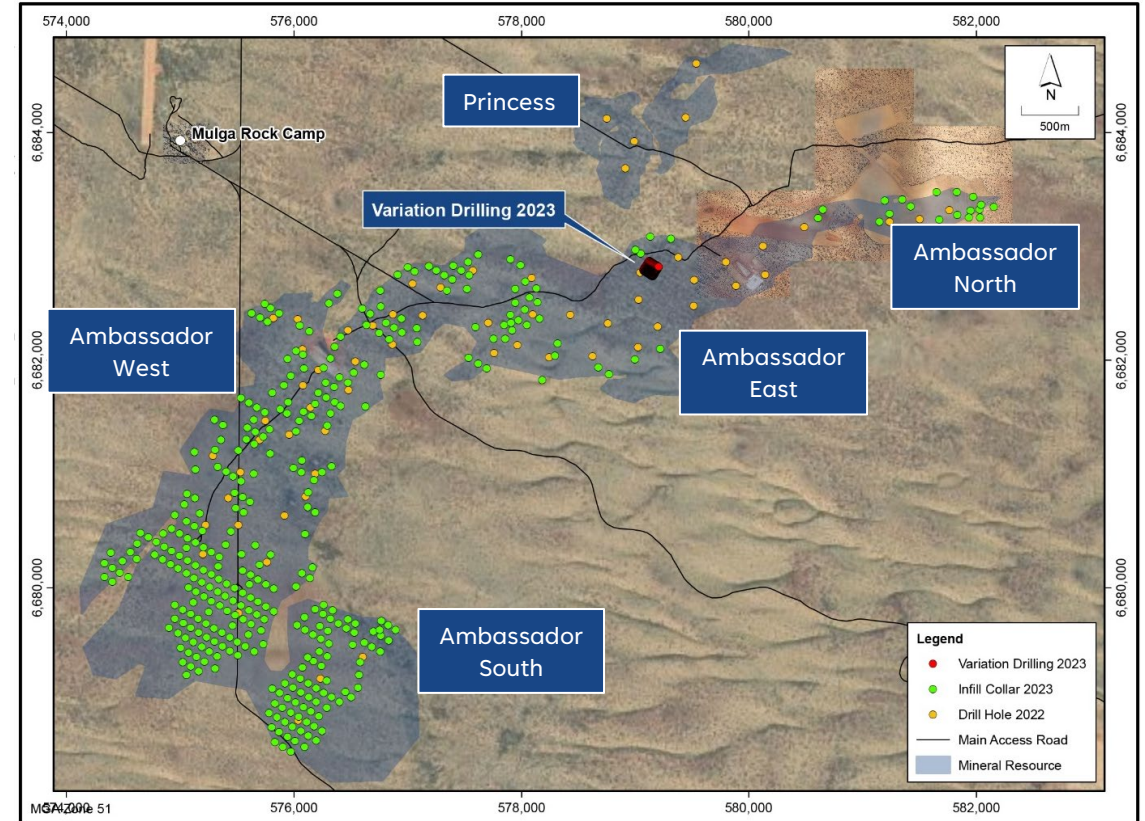

Mulga Rock East – Strong Resource Upgrade

- Extensive resource/reserve upgrade and ore variability drilling programs completed August 2023
- **Significant uranium, critical minerals (Cu, Ni, Co, Zn) and magnetic rare earth elements (notably Nd/Tb/Dy/Pr) resources identified**
- Updated MRE to Measured/Indicated status released to ASX 26 February 2024 with strong results
- Post-acquisition revised DFS completion due Q3-CY2025, with significant value uplift expected within permitted footprint

Class	PREVIOUS MRE			UPDATED MRE				
	Tonnes (Mt)	U ₃ O ₈		Tonnes (Mt)	U ₃ O ₈		U ₃ O ₈ Eq*	
		(ppm)	(Mlb)		(ppm)	(Mlb)	(ppm)	(Mlb Eq)
Total	38.2	673	56.7	81.2	400	71.2	590	105.3

*U₃O₈ Equivalent (U₃O₈Eq) = U₃O₈ + 0.093xCu + 0.028xCo + 0.074xNi + 0.118xREO + 0.009xZn

Refer Appendix 2

Opportunity to develop Mulga Rock into a polymetallic operation, extending life of mine beyond current 15 years, with significant increase to project value and strategic importance

Exceptional Exploration Upside

ALLIGATOR RIVER PROJECT, NORTHERN TERRITORY – 100%

- Located in the world-class uranium province of Alligator River, which hosts some of the highest-grade uranium deposits in the world (unconformity-related, Athabasca-style)
- Support from Traditional Owners
- Angularli Mineral Resource – 33Mlb @ 1.09% U_3O_8
- Potential for discovery of large, >100Mlb uranium deposits

OMAHOLA BASEMENT PROJECT, NAMIBIA – 100%

- Measured, Indicated and Inferred Resource base of 125Mlb at 190ppm U_3O_8 across-Ongolo, MS7 and Inca deposits¹
- 35km prospective zone, with strong potential for additional discoveries
- Shallow drilling program of ~200 holes for 7,100m identified 3 highly-promising targets for follow up
- 50% of basement prospective zone remains to be tested

¹Refer to ASX announcement dated 4 November 2021

06

Looking Ahead – A Differentiated Company

Two Substantial, Advanced Uranium Projects to Produce +7Mlb

Tumas – DFS complete, FID Q3 2024 – aiming for production 2026

Mulga Rock – Post-acquisition revised DFS starting Q2 2024 to improve on project economics

Deep Yellow has two advanced projects, with development schedules identified, ready to capitalise on higher uranium prices

Key Workstreams and Anticipated Timing

TUMAS PROJECT	MULGA ROCK	ALLIGATOR RIVER	M&A
<ul style="list-style-type: none"> • Mid 2024 – 6-year Proven Reserve drill-out and resource reporting completed • Late Q1 2024 – EPCM engineer selected • Q3 2024 – Mining schedule for first 6 years of operations completed • Q3 2024 – Project finance finalised (maximised, uranium price dependent) • Late Q3 2024 – Final Investment Decision to proceed 	<ul style="list-style-type: none"> • 26 Feb 2024 – Strong results from new resource upgrade for uranium, critical minerals and rare earths, with revised mining footprint within approval area • Q2 2024 – Completion of test work for critical mineral and rare earth element analysis • Q2 2024 – Commencement of revised DFS, incorporating new inputs for uranium and non-uranium value uplift 	<ul style="list-style-type: none"> • Q2 2024 – Desktop prospectivity appraisal to define exploration corridors for concurrent investigations • Q2 2024 – 5-year exploration plan to unlock value • Q3 2024 – Exploration and resource upgrade drilling commences 	<ul style="list-style-type: none"> • Ongoing – Continued focus on accretive consolidation to develop larger scale with high quality mining assets

Best Positioned Pure-Play Uranium Investment

Deep Yellow is successfully establishing the right platform at the right time

Uranium market backdrop creates exceptional opportunities in the post-Fukushima supply reconstruction era and taking advantage of a bifurcated market

Experienced Board and proven leadership supported by executive and technical teams strong in all operational, financial and governance domains

Deep Yellow is on a pathway to becoming a leading, reliable and long-term uranium producer, able to provide production optionality and security of supply with geographic diversity

07

Appendices

Appendix 1(a)

Namibian Mineral Resources

Notes:

- Figures have been rounded and totals may reflect small rounding errors.
- XRF chemical analysis unless annotated otherwise.
- # Combined XRF Fusion Chemical Assays and eU_3O_8 values.
- ♦ eU_3O_8 - equivalent uranium grade as determined by downhole gamma logging.
- Where eU_3O_8 values are reported it relates to values attained from radiometrically logging boreholes.
- Gamma probes were originally calibrated at Pelindaba, South Africa in 2007. Recent calibrations were carried out at the Langer Heinrich Mine calibration facility in July 2018, September 2019, December 2020, January 2022, and February 2023.
- Sensitivity checks are conducted by periodic re-logging of a test hole to confirm operations.
- During drilling, probes are checked daily against standard source.

- Figures have been rounded and totals may reflect small rounding errors.
- XRF chemical analysis unless annotated otherwise.
- ♦ eU₃O₈ - equivalent uranium grade as determined by downhole gamma logging.
- # Combined XRF Fusion Chemical Assays and eU₃O₈ values.
- Where eU₃O₈ values are reported it relates to values attained from radiometrically logging boreholes.
- Gamma probes were calibrated at Pelindaba, South Africa, at the Langer Heinrich Mine calibration facility in Namibia and at the Australian facility in Adelaide.
- During drilling, probes are checked daily against standard source.

Appendix 2 – Uranium Equivalents (refer Mulga Rock East slide 23)

U₃O₈Eq grades are calculated as follows:

$$\text{U}_3\text{O}_8\text{Eq} = \text{U}_3\text{O}_8 + 0.093\text{xCo} + 0.028\text{xCu} + 0.074\text{xNi} + 0.118\text{xREO} + 0.009\text{xZn}$$

- Those factors were calculated using the assumptions presented in the table below and, based on testwork completed to date, the Company believes that all the critical minerals (Co, Cu, Ni, Zn, REO) can be recovered and a saleable product can be produced for each relevant element
- Long-term price assumptions were derived using TradeTech® proprietary FAM2 supply/demand scenario (2023 Issue 4) for uranium oxide and cost curves-based (~ 75% percentile) or consensus analyses for cobalt, copper, nickel and zinc
- Analysis of price variations for critical minerals indicates minimal change in the resulting U₃O₈Eq cut-off grade
- Long-term (**LT**) prices for REO were assigned using independent long-term prices derived from a composite of industry specialists (based on individually modelled 20-year prices for individual REOs)
- Only Magnetic Rare Earth Oxides (**MREO**, or the sum of Dy₂O₃, Nd₂O₃, Pr₂O₃ and Tb₂O₃), which account for about 35% of the total REO by weight and approximately 90% by value at the MRP, were assigned a value for equivalent grade reporting purposes

Element	U ₃ O ₈	Co	Cu	Ni	REO	Zn
Price Assumption (US\$/t)	187,423	35,000/t	9,000	22,000	65,201 ¹	2,500
Recovery ²	93%	57%	68%	72%	55%	74%
Payability	98%	85%	85%	85%	60%	85%

¹ LT Price assumption of US\$65,201/t if expressed as the sum of MREO grades.

² Combined physical beneficiation and leach extraction.
